

# **Energy- and climate advisors**

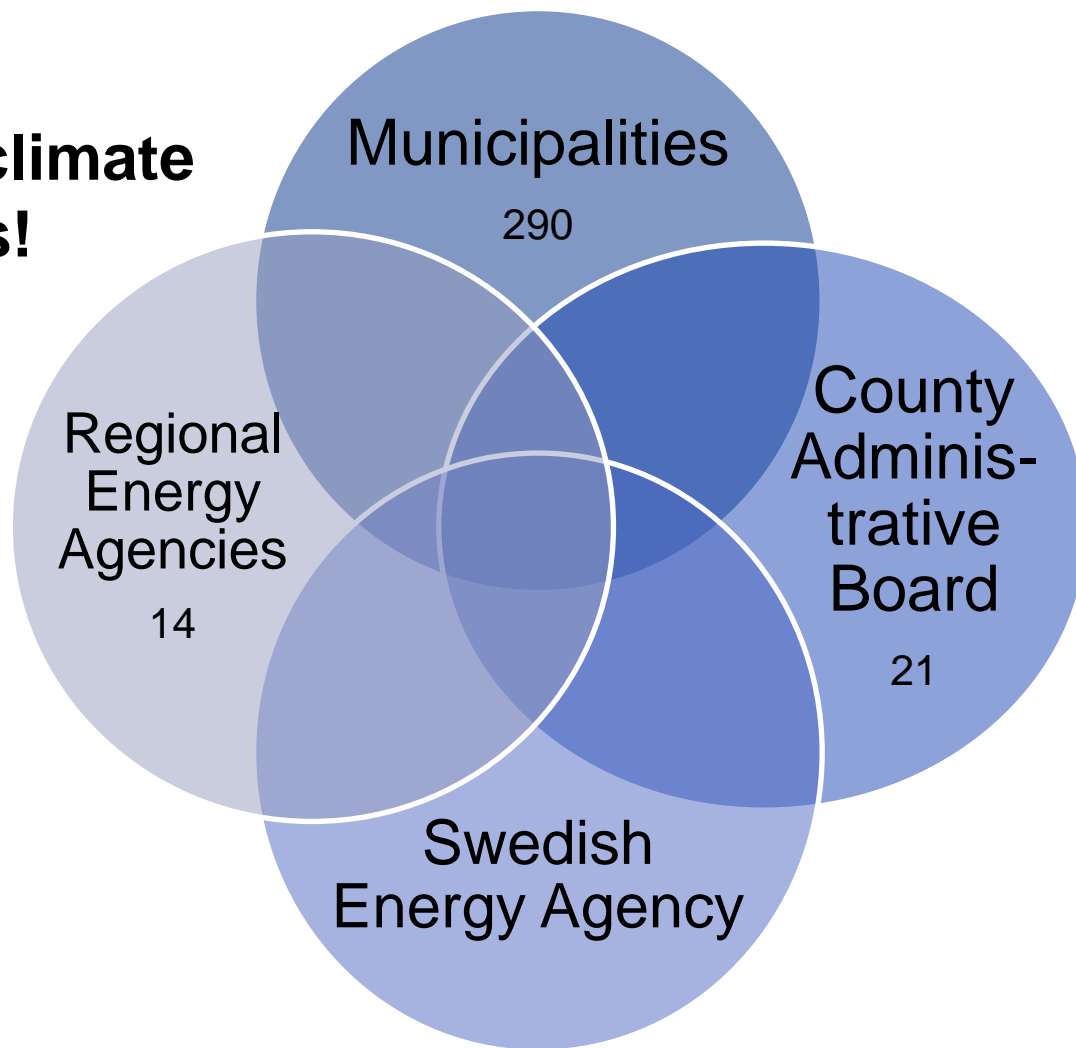

## The Swedish model

# Overall essential objectives for Swedish Energy Agency

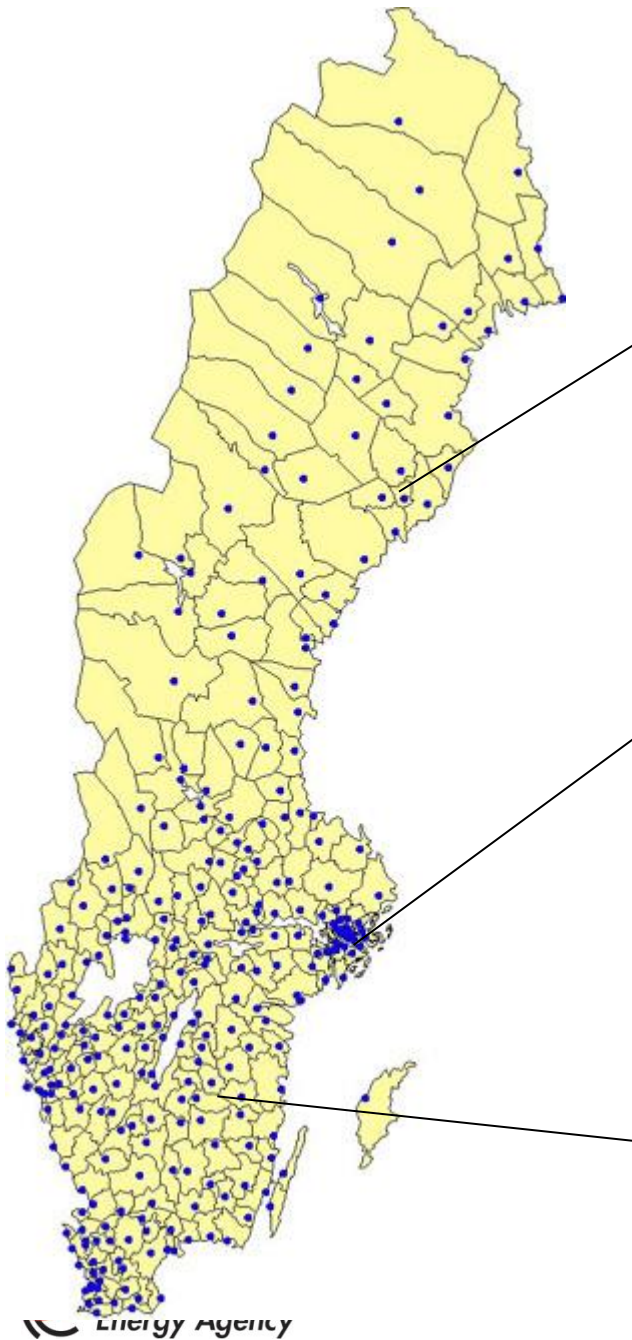

## Vision: a sustainable energy

# Energy- and climate advisors!

# 290 municipalities

Smallest: Bjurholm  
2 500 inhabitants

Largest:  
Stockholm  
795 000

Medium:  
Eksjö 16 500

# Energy- and climate advisors

- Sweden is making great efforts to provide advice on energy, climate and transport to our citizens
- Energy and climate advisors in every municipality
- The information is free of charge and impartial
- Today about 250 advisors
- Target groups; Households, SMEs and organisations

# Efforts from the Swedish Energy Agency towards Energy- and Climate Advisors

- Training/education (mandatory and desired)
- Publications/leaflets
- Events and conferences
- Contribution (financial) to different projects
- Other tools (internet)

# Results and experiences

- Each year an evaluation of the effects is done
- **Results from 2012**
  - 60 % of households and 75 % of SMEs has changed behaviour after advise.
  - The avarage energy saving is **10-13 MWh for households** and **20-30 MWh for SMEs.**
  - Total number of contacts;
    - 20 000 Households (80%)
    - 3000 SME (12%)
    - 2000 Organisations/others (8%)

**But the potential is greater!**
